# COLOR HARMONY LIBRARY™

## Purpose

The Color Harmony Library exists to provide SOLEA with elegant, descriptive color language when building custom harmony palettes.

Colors should never be assigned through categories.

Colors should be selected based on observed harmony.

The names below are references and inspiration.

They are not fixed palettes.

They may be combined freely when harmony supports the recommendation.

---

# LIGHT NEUTRALS

Examples:

- Warm Ivory
- Soft Cream
- Champagne Beige
- Almond Silk
- Oat Linen
- Coastal Sand
- Stone Ivory
- Soft Ecru

- Deep Olive
- Forest Pine
- Aubergine
- Midnight Navy
- Deep Teal
- Cocoa Brown
- Walnut
- Rich Charcoal
- Smoky Emerald

Typical effect:

- grounding
- richness
- sophistication
- visual depth

---

# COLOR SELECTION PRINCIPLE

Do not build palettes from predetermined groups.

Instead:

Observe:

- light response
- temperature response
- contrast response
- saturation response
- depth response

Then select colors that support harmony.

Every palette should feel individual.

Every palette should feel intentional.

Every palette should feel recognizable to the person receiving it.

The goal is not classification.

The goal is recognition.
